

LEGAL NOTICES.

THOMAS L. JONES, ATTORNEY
Supreme Court of the District of
Columbia.

Holding a Probate Court.
No. 13,425, Administration.
This is to Give Notice:

That the subscriber, of the District
of Columbia, has obtained from the
Probate Court of the District of Col-
umbia, Letters Testamentary on the
estate of Levi Brooks, Jr., late of the
District of Columbia, deceased. All
persons having claims against the de-
ceased are hereby warned to exhibit
the same, with the vouchers thereof,
legally authenticated, to the subscrib-
er, on or before the 8th day of July,
A. D. 1907; otherwise they may by
law be excluded from all benefit of
said estate.

Given under my hand this 8th day
of January, 1907.

David Hawkins, Chevy Chase Lake.
Attest:

James Tanner, Register of Wills
for the District of Columbia. Clerk
of the Probate Court.

Thomas L. Jones, Attorney.

FOR RENT.

Three newly furnished rooms for
rent. 1742 14th street, N. W.

Mrs. Charlotte V. Hicks, wife of Jas.
H. Hicks, No. 20 Prospect street, N. E.,
died Sunday morning at 2 o'clock. Her
funeral was at the People's Congrega-
tional Church, of which she was a mem-
ber.

Prof. Moore, who officiated was as-
sisted by Rev. U. J. Howard, and Dr.
S. S. Corrothers. By the crowded con-
gregation it showed that she was held in
high esteem by her many friends.

In the temple of King Solomon there
was a ten-pipe organ.

In 1852 the property owned by colored
people in the United States was \$18-
000,000. Today property owned by col-
ored people in this country is \$400,000-
000. There are 240 colored lawyers,
2600 doctors and 975 men and women
dentists. In 1819 there were 22 States
in the United States, 11 free and 11
slave. After the war there were three
amendments to the constitution. The
first made the negro free, the second
made him a citizen, and the third a
voter. From 1880 to 1890 the illiteracy
of the colored people in the South has
decreased 75 per cent.—Synopsis ex-
tract from speech made by H. J. G.
Jones, 33d degree, of Ill.

The time is here that we must put
our best men forward and then back
them up, stopping the kicking act; also
we must support enterprises carried on
by our people. A great many of them
cannot rule, will ruin.

It is so funny how some people when
they want favors done will almost run
the life out of you and when they have
attained the desired object, have no use
for you. There are lots of funny things
that go on in this life.

**FORD'S
HAIR POMADE**
Formerly known as
"OZONIZED OX MARROW"
KINKY OR CURLY HAIR that it can be put
up in any style desired consists with its
length.
Ford's Hair Pomade was formerly
known as "OZONIZED OX MARROW" and it
is the only safe preparation known to us that
makes kinky or curly hair straight, as
shown above. It also makes the most stiff-
bored, harsh, kinky or curly hair soft, so-
phisticated and easy to comb. These results
may be obtained from one treatment; 2 to 4
bottles are usually sufficient for a year. The
use of Ford's Hair Pomade ("OZONIZED
OX MARROW") removes and prevents dan-
druft, relieves itching, invigorates the scalp,
stops the hair from falling out or breaking off,
makes it grow and, by nourishing the roots,
gives it new life and vigor. Being elegantly
perfumed and harmless, it is a toilet
necessity for ladies, gentlemen and children.
Ford's Hair Pomade ("OZONIZED OX
MARROW") has been made and sold contin-
uously since about 1888, and label, "OZONIZED
OX MARROW" was registered in the United
States Patent Office, in 1901. In all that long
period of time there has never been a bottle
returned from the hundreds of thousands who
have sold. FORD'S HAIR POMADE remains
sweet and effective, no matter how long you
keep it. Be sure to get Ford's, as it is the
only one that makes the hair STRAIGHT, SOFT and
PLEASANT. Beware of imitations. Remember
that Ford's Hair Pomade ("OZONIZED
OX MARROW") is put up only in 50 ct. size,
and is made only in Chicago and by us. The
genuine has the signature, Charles Ford, Pres-
ident, on each package. Refuse all others. Full di-
rections with every bottle. Price only 50 cts.
Sold by druggists and dealers. If your druggist
or dealer can not supply you, he can
procure it from his jobber or wholesale dealer
or send us 20 cts. for one bottle postpaid, or
\$1.40 for three bottles or \$2.50 for six bottles,
express paid. We pay postage and express
charges to all points in U. S. A. When order-
ing send postal or express money order, and
mention this paper. Write your name and ad-
dress plainly to
The Ozonized Ox Marrow Co.
(None genuine without my signature)

COW MOST DANGEROUS

CAUSES MORE DEATHS THAN ANY
OTHER BEAST.

Bureau of Animal Industry Issues Bul-
letin of Warning as to Dan-
ger of Tuberculosis from
Milk.

Washington.—In a most remarkable
report published as a bulletin by the
bureau of animal industry of the de-
partment of agriculture, warning is
sounded as to the danger of tuberculo-
sis being communicated to human be-
ings through cows.

The bulletin embodies a report of
experiments that have been conducted
by Dr. E. C. Schroeder and W. E. Cot-
ton, of the experiment station of the
bureau of animal industry. They have
undertaken experiments with hogs
and cattle for the main purpose of
testing the susceptibility of the lung
to infection from tubercle bacilli re-
gardless of the point at which the ma-
terial enters the body. Not only was
it shown that tuberculosis may readi-
ly be caused in the lungs, no matter
through what channel the bacilli gain
entrance to the body, but various oth-
er facts were demonstrated having an
important bearing on the communica-
tion of this dread disease.

The experts as a result of their in-
vestigations conclude that tuberculosis
is contracted through the entrance of
tubercle bacilli; that the lung is the
organ most frequently affected, regard-
less of where the infectious material
enters the body; that tuberculosis in-
fection may pass from one part of the
body to another without leaving a
chain of lesions to mark its path; that
fresh tubercle material has the high-
est significance, and that dried and
pulverized material has a doubtful sig-
nificance.

These important conclusions in re-
gard to the cattle and dairy products
are drawn:

"Tuberculosis material from cattle
has the highest virulence for all tested
species of the mammalian kingdom, to
which man anatomically and physi-
cally belongs, and tuberculosis ma-
terial from man has a lower viru-
lence."

"Man is constantly exposed to fresh
tuberculosis material in a helpless way
through his use of dairy products
from tuberculous cattle."

While many cases of tuberculosis
undoubtedly have their origin through
food directly or indirectly infected
with fresh tuberculous persons, there
is no means to-day by which persons
are brought into closer contact with
fresh tuberculosis material than milk
and dairy products obtained from and
in the environment of tuberculous
cows. The wide use of milk, its rapid
distribution because of its perishable
character, the ease with which it may
be contaminated, all speak for one
conclusion, namely, that we have no
more active agent than the tuber-
culous cow for the increase of tuber-
culosis among animals and its per-
sistence among men."

CLEVELAND BOY BAD AGAIN.

Knock on Head Offsets Reformatory
Work of Surgeons.

Cleveland, O.—The fates seem to
have decided that 15-year-old Leo
Dean shall be a bad boy, in spite of
juvenile courts, reformatories and sur-
geons' trepanning.

Leo had quite a record as an incor-
rigible before it was discovered that
his perversity dated from a whack on
the head he had received when a child.
Cranial surgery for the correction of
mental abnormalities was just com-
ing into vogue and through the instru-
mentality of the juvenile court Leo
became one of the first subjects ex-
perimented upon here. Drs. George
W. Crile and Harry H. Drysdale re-
lieved the pressure on Leo's brain and
Leo got to be a very good boy in-
deed.

One day he saw some men taking
down an awning. The spectacle en-
chanted him and he stood gazing up-
ward. A hammer slipped, fell and by
an almost incredible mischance
cracked Leo on the head in the exact
spot where fate had buffeted him in
childhood.

Now Leo is a bad boy again, a very
very wayward delinquent. Mrs. Calla-
ghan, probation officer, has interested
herself in his behalf and hopes to in-
duce the surgeons to repeat their
work as the fates did theirs.

NEW POST OFFICE FOR LONDON.

Will Be Finest Building of Kind in
World When Completed.

London.—The plans for building a
new post office in this city on the site
of the ancient Christ hospital in the
Strand have just been completed, and
the building, which is to be one of the
most magnificent in the metropolis,
will be made of armored cement, not a
brick or a single piece of stone enter-
ing in its construction.

The grounds to be utilized cover a
surface of two and one-half acres, and
the whole of the enterprise is in the
direct charge of the treasury. Already
workmen have started to excavate the
grounds for the foundations, which
will be laid at a depth of 30 feet,
and which will probably be the cause
of many engineering complications be-
cause below the level of the Thames
river.

When finished the building will be
the best specimen of cement construc-
tion in the world, even the chimneys,
stairways, partitions and light wells
having to be cast in moulds.

INFANT DEATH RATE REDUCED.

Novel Scheme of an Englishman Les-
sens Mortality.

London.—Alderman Benjamin
Broadbent, M. D., the retiring mayor
of Huddersfield, England, has just an-
nounced the result of the two years'
test of his novel scheme for the pre-
vention of infant mortality in his na-
tive part of the borough—Longwood.

On taking office as chief magis-
trate two years ago, Alderman Broad-
bent offered five dollars to the parents
of each child born during the period
of his mayoralty that reached the age
of 12 months.

Instructions to mothers—some of
which were suggested by the princess
of Wales—were sent out, and the
mothers were visited by voluntary
women visitors, who reported prog-
ress.

The Huddersfield rate of infantile
mortality had averaged 139 for ten
years, and in Longwood itself the av-
erage for ten years was 122.

In Mayor Broadbent's two years 112
babies received the promissory note
card for five dollars. Of that number
107 had actually received the gift he
had offered. Out of the five left four
had died and one had been removed
from the district and he did not know
whether the child still lived or not.

If he counted only the four deaths
the figures were 35 per 1,000, and if
he counted the missing baby as dead
the figures were 44. These figures
compared very strikingly with the
previous figures of 122 per 1,000 for
Longwood and the average of 139 in
the whole town of Huddersfield.

The experiment has reduced the
death rate to much less than half.
His own estimate of the result was
that it was astounding. For exactly
12 months—from October 9, 1905, to
October 9, 1906—not one of the babies
on his list died under the age of one
year. The babies belonged to all
classes and there was no selection,
some living in places hardly better
than slums.

Very great general interest has
been taken in Alderman Broadbent's
experiment and inquiries, including
one from President Roosevelt, have
been received from municipalities all
over the world.

PRODUCTS OF THE MINES.

Country's Output for the Year 1905
Worth \$1,623,877,127.

Washington.—A most interesting
chapter in the volume entitled "Min-
eral Resources of the United States,
1905," published by the United States
geological survey, is that which con-
tains a summary of the mineral pro-
duction of the United States during
that year.

In 1905, for the seventh time, the
total value of the country's mineral
production exceeded the enormous
sum of \$1,000,000,000. The exact fig-
ures for 1905 are \$1,623,877,127, as
compared with \$1,360,883,554 in 1904.

As heretofore, iron and coal are the
most important mineral products.
The value of the iron in 1905 was
\$382,450,000; the value of the coal,
\$476,756,963. The fuels increased
from \$584,043,236 in 1904 to \$602,477-
217 in 1905, a gain of \$18,433,981, or
3.16 per cent. Anthracite coal show-
ed an increase in value of \$2,904,890
from \$138,974,020 in 1904 to \$141,878-
900 in 1905. The increase in value
of the bituminous coal output over
1904 was \$29,480,962, a combined in-
crease in value of coal of \$32,385,942
in 1905, or 7.3 per cent.

The gain of \$262,963,573 in the to-
tal value of the mineral production is
due to gains in both metallic and non-
metallic products, the metallic prod-
ucts showing an increase from \$501-
099,950 in 1904, to \$702,453,108 in
1905, a gain of \$201,353,158, and the
nonmetallic products showing an in-
crease from \$859,383,604 in 1904 to
\$921,024,019 in 1905, a gain of \$61-
640,415. To these products should be
added unspecified products, including
molybdenum, bismuth, tungsten and
other mineral products, valued at
\$400,000, making the total mineral
production for 1905 of \$1,623,877,127.

Besides the usual table and sum-
mary of quantities and values of the
country's mineral output by products,
the volume contains this year, for the
first time, a summary, in tabulated
form, of the value of the mineral
products by states.

FARMERS STOP WORKMEN.

With Pitchforks and Guns They Hold
Up Work on Transmission Line.

Lockport, N. Y.—A gang of farmers,
armed with pitchforks and guns, held
up work on the transmission line of
the Niagara, Lockport & Ontario Pow-
er company, near here, while work-
men were engaged in building fences
to separate the transmission line prop-
erty from the farm lands. The farm-
ers declare that they gave the com-
pany deeds to a strip of land 200 feet
wide, but the company is endeavoring
to steal more land by placing the
fences on the farm lands regardless
of the dividing lands.

The farmers held that they could
not get satisfaction by peaceful meth-
ods, and accordingly organized at a
farm house and drove to the scene of
operations in a hay wagon. Lining
themselves up across the transmission
line, they ordered the workmen to
quit, at the same time leveling their
guns and holding the forks in a threat-
ening attitude. The workmen sneered
at the farmers and continued opera-
tions. Then a battle started. Guns
were fired, and the workmen, be-
coming frightened, ran away. No one
was hurt. The differences will be set-
tled by a consultation between the
company and the farmers.

PEOPLE'S DRUG STORE,

824 Seventh Street, N. W.

COLD WEATHER DRUG NEEDS.

SEASONABLE GOODS VERY SPECIALLY

PRICED.

You probably will need lots of drug store goods between now and the
Springtime, and we want to supply you if you do need them. We have some
specialties which are very seasonable just now and we stand right back of all
preparations bearing our label. Guarantee them to be of highest medicinal val-
ue, and—if they don't benefit you we will refund your money.

CHERRI-TONE PECTORAL.
A cough cure that cures. Don't
Argue. Don't Infer. Try it. It
cures every time.

Cut this out and present it to
us and we will give you the 25c.
bottle for 17c.

JAPALMO LOTION.

Hands of velvet in a single
night.

A perfect substitute for Cam-
phor Ice Glycerine, and cold
cream.

Gloves can be worn immedi-
ately after using.

25c. is the price.

Cod Liver Oil fresh from Lafoten, Norway, Dr. Vald's famous brand. No
better can be bought at any price. Pint bottles 25c.

Our store is always busy and there's a reason. Nowhere in all Wash-
ington will you find such a complete, up-to-date stock. Nothing grows stale
here for our low prices keep our stock moving rapidly.

DOGS CAN HAVE APPENDICITIS.

Veterinary Surgeon of Monroe, Mich.,
Finds Three Cases.

Monroe, Mich.—Dr. A. L. Tiffany, a
young veterinary surgeon of this
place, has decided that dogs are sub-
ject to the diseases of the vermiform
appendix, the same as human beings,
and that death will result from the in-
flammation of that organ in dogs as
well as human beings.

Dr. Tiffany was called some days
ago to treat a pet fox hound and dis-
covered that cathartics had no effect,
and the dog died last night. The doc-
tor decided to find the cause of death.
He found the organs in general good
order, but the regions of the kidneys
and intestines was highly inflamed
and the appendix doubled back of it-
self and was the center of the inflam-
mation.

This is the third instance which the
doctor has found where the death of a
dog might be ascribed to appendicitis,
and to his knowledge the subject
never has been treated in any work
upon the diseases of domestic ani-
mals.

"Sock Shower" Shocks Benedict.

St. Louis.—After friends had an-
nounced that a "sock shower" was to
be given in his honor as a testimonial
to his marriage, C. J. Leach found
the shower to be one pair of socks,
worth about ten cents, and on which
charges of one dollar were imposed.
The result has been the immediate or-
ganization of a bachelors' club. The
penalty for deserting this organiza-
tion will be a dinner, at which the de-
serter is to be the host.

HIDDEN ISLES OF THE SEA.

Many a noble ship, richly laden with
the proudest spoils of human industry
and enterprise, and freighted with that
which is dearer still—human life—has
passed away with the morning sunlight
glittering on its snowy canvas, passed
away, never to arrive at its destination;
passed away forever from the ken and
knowledge of men as completely as if
it had never been in existence.

What has become of those vanished
argosies? Whither have they gone?

When the seas give up their dead, and
the old ocean lays bare its secrets, the
human skeletons, the virgin gold, the
priceless gems, the costly jewels, and
the wrecks of those vanished ships will
be found strewn amid the tremendous
passes and deep defiles of those sub-
merged mountain ranges which are the
backbones of lost continents, upon those
topmost peaks, projecting near the sur-
face of the seas, these lost convoys have
been dashed to destruction! The mar-
iner's compass and the navigator's chart
have not been able to protect commerce
from the wreck and ruin of these sub-
merged ridges, but the good ship "Co-

lumbia," richly laden with its precious
cargo of "Columbia Club," the purest
and best whiskey in the world, launched
and navigated by William J. Donovan
from the famous Baseball House, located
at 1528 Seventh street, N. W., with the
Stars and Stripes glittering from its
gaff and defiance to all competitors thun-
dering from its steel-clad turrets, has
weathered every gale and returned safe-
ly from every voyage, because Mr. Don-
ovan knows the highways of successful
enterprise are strewn with the detritus
of pretension and misrepresentation, and
that quality alone, and quality strictly
and strenuously adhered to, is the only
chart and surest recommendation of
those who wish to indulge in the deli-
cious, stimulating, health-giving virtue
of a truly honest American whiskey—the
"Columbia Club."
